

# Northern Public Radio

This is my ongoing work with Northern Public Radio in collaboration with the Data, Devices and Interactive Laboratory.

Subject: Illinois College & University Enrollment Trends

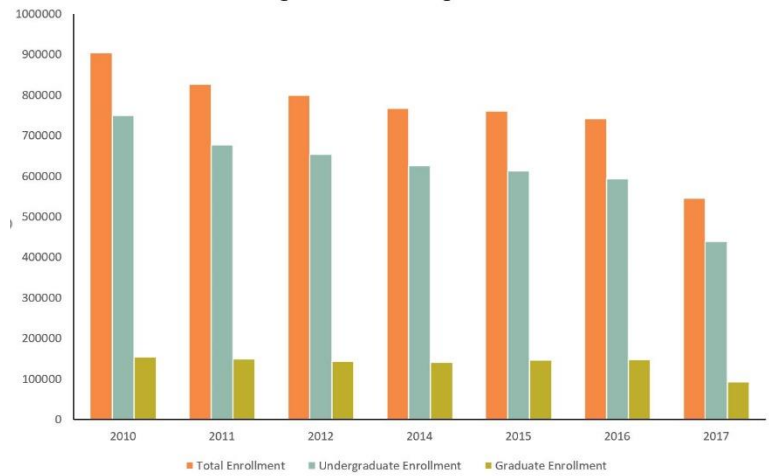

I am working using the data from 2010-2017 from Illinois Education Board to find the Enrollment Based on Type of Institution and what types of schools are Illinois students going to more or less compared to past.

Below are the prototypes developed in tableau (dated May 01,2019). This is still an ongoing work
